

**Autonomics CMS-ASI motor starter**

Autonomics CMS-ASI (Compact Motor Starter) is a fieldbus-controlled motor starter for distributed automation.

Thanks to firm enclosure CMS-ASI is suitable for harsh environment applications and compact size makes mounting easy even to a small machine.

All The used components are generally used in industry and they are made by leading manufacturers. That ensures reliable availability for replacement components.

**Mechanical characteristics**

- Painted steel enclosure, height 200mm width 150mm depth 120mm
- Splash-proof enclosure
- Hinged door
- Lockable safety switch with thermal release indicator
- Lockable bus / manual switch

**Electrical characteristics**

- Motor size up to 4 kW AC3
- Fieldbus interface according ASi 7.1 specification with 4I4O ASi-slave

**Electrical Interfaces**

- Harting HanDrive motor line connectors
- M12 standard connector for ASi + External 24V
- M12 standard connector for 2 external inputs
